## FOOD-SAFE AND GENERAL-PURPOSE

# GLOVES

Disposable protective gloves are an important first-line level of defense for personnel in the foodservice, food processing, hospitality, manufacturing, janitorial, sanitation, and other related industries. Proper hand hygiene and glove selection are critically important for ensuring that businesses and their employees are protected from cross-contamination and neither contract nor spread foodborne illnesses among themselves, to the food itself, to their work environment, or to their customers.

Building on three decades of focused expertise as a healthcare-based enterprise and food safety solution innovator, Tronex Safety Solutions has developed a comprehensive line of food-safe and general-purpose gloves that are quality crafted utilizing medical-grade technology in our state-of-the-art ISO-certified and U.S. FDA-registered facilities. Our superior quality gloves are available in all of the major materials, including vinyl, synthetic, polyethylene (PE), latex, and nitrile – all in the latest generation material formulations and offered in a variety of styles, lengths, gauges, sizes, and textures.

As a medical-based company, Tronex also offers a full selection of the highest quality and most advanced formulation disposable examination-grade gloves in the market today. Tronex exam-grade gloves deliver superior performance and barrier protection parallel to the industry-leading quality and proven reliability for which Tronex is renowned.

# VINYL

## GENERAL-PURPOSE (GP) GLOVES

Tronex disposable vinyl GP gloves are formulated from virgin polyvinyl chloride (PVC) and manufactured to the highest barrier protection standards. They offer unparalleled sensitivity, elasticity, durability, and a silken feel.

Our extensive selection of vinyl GP gloves ranges from advanced, lightweight formulations to heavier, more durable styles. To facilitate ease of selection, we have classified each glove type by its primary performance attribute:

- Exceptional Dexterity
- Superior Versatility
- Enhanced Durability

### EXCEPTIONAL DEXTERITY

- Comfortable, contoured fit
- Excellent sensitivity
- Ideal for frequent-change environments, food preparation, and serving

# SYNTHETIC

## GENERAL-PURPOSE (GP) GLOVES

Specially manufactured from advanced and proprietary synthetic compounds, Tronex disposable synthetic GP gloves offer a quality, value-based alternative to latex. They provide a comfortable, non-fatiguing fit and effective barrier protection for those who prefer a non-latex glove.

### “SYNTECH®” SYNTHETIC POWDERED GLOVES

- High performance elasticity, dexterity, and sensitivity
- Powdered with U.S. Pharmacopeia (USP) grade cornstarch for easy donning
- Excellent barrier protection and non-fatiguing fit

### “CLEAN n SAFE®” SYNTHETIC POWDER-FREE GLOVES

- Superior quality consistency and durability
- Featuring exceptional flexibility, fit, and smooth feel
- Powder-free
- Excellent barrier integrity and performance

# MULTIPURPOSE AND SPECIALTY

# GLOVES

Material composition, quality standards, and manufacturing processes all impact how a glove performs and protects during heavy-duty specialty workforce applications. Proper selection of the glove type to meet the critical quality, performance, protection, and value demands within each setting is essential to ensure optimal protection for professionals in the foodservice, food processing, hospitality, manufacturing, janitorial, sanitation, and other related industries. Our diverse product offerings include advanced nitrile and latex glove styles, available in a range of sizes, textures, finishes, and thicknesses. Whether the application requires chemical or high puncture resistance, a secure grip, or extended-wear protection, Tronex gloves are meticulously crafted to address the important Personal Protective Equipment (PPE) and value requirements of today's workforce.

## 12" MULTIPURPOSE FLOCK-LINED LATEX GLOVES

# APPAREL

---

Tronex Safety Solutions is pleased to offer a comprehensive and evolving line of innovative, head-to-toe Personal Protective Equipment (PPE) that has been meticulously crafted to meet and exceed all industry standards for quality and safety, while simultaneously delivering exceptional value. Manufactured in our ISO 9001-certified factories, the entire line of Tronex disposable apparel provides superior protection and durability, while retaining fit and comfort.

All of our advanced apparel products are constructed from high-quality fluid-resistant or fluid-impervious materials, and are not made with natural rubber latex.

At Tronex, our dedication to continual innovation is demonstrated by our successful expansion and growth through our current product lines and emerging, major product categories, leveraging our deep expertise and further building upon our reputation for leading quality and delivery excellence for our treasured customers.

### BOUFFANT CAPS

- Meticulously constructed from a soft, breathable, nonwoven spunbond material
- Fluid resistant
- Soft elastic closure for comfortable, secure fit

### BEARD COVERS

- High-quality nonwoven spunbond material
- Breathable and fluid resistant
- Attach securely to provide effective beard restraint and particle barrier
- Offered in single-hook and double-hook styles

### NYLON HAIRNETS

- Premium nylon offers lightweight feel and breathability
- Contoured fit for optimal comfort
- Individually packaged to maintain integrity and prevent tangling

# FACIAL PROTECTION

---

Disposable procedure face masks are intended to protect the respiratory system by blocking large-particle airborne substances or droplets from entering the nose or mouth, whereas N95 respirators are much closer fitting and designed to protect wearers from the inhalation of very small airborne particles and aerosols. For many applications, fluid-resistant procedure face masks offer sufficient protection; however, in instances where exposure to airborne viruses or aerosol contaminants is probable, N95 respirators may be the most appropriate choice.

All Tronex procedure face masks and National Institute for Occupational Safety and Health (NIOSH)-approved N95 respirators are meticulously crafted with precision stitching and carefully manufactured in our ISO 9001-certified factories to provide optimal protection and durability while retaining fit and comfort for their intended applications.

# FACE MASKS

Tronex disposable procedure face masks provide superior comfort and protection while meeting or exceeding all industry standards for safety and quality. Quality ultrasonic bonding at the edges maximizes both performance and fit.

## With Earloops

Item Code	Size	Color
5040B	Unisize	Blue

50 masks/box, 6 boxes/case

## With Ties

Eyeshield

# NIOSH N95

## RESPIRATORS

Tronex N95 respirators are precision-crafted and form-fitted to the face. When properly fitted, they provide effective protection against the inhalation of dangerous particulates and the transmission of airborne pathogens, per NIOSH 42 CFR Part 84 N95 respirator requirements. Designed for extended wear and offering an optimal seal for a wide range of facial structures, our quality disposable respirators meet or exceed all industry standards for safety and quality assurance while providing superior comfort and protection.

### Cone Style

Item Code	Size	Color
536N95C	Unisize	White
511N95S	Small	

20 masks/bag, 1 bag/box,  
12 boxes/case

- In addition, Tronex offers a full line of fit testing kits and supplies in full support of the requirements mandated by the Occupational Safety & Health Administration (OSHA).

# FOOD STORAGE AND

# ACCESSORIES

Tronex offers several food storage items and accessories designed for diverse settings and applications, in addition to a full line of Health and Safety Kits. Our disposable poly bun pan rack covers and deli bags are quality crafted to offer excellent visibility while safely protecting food and helping to maintain freshness. Tronex glove racks are designed to fit most glove box sizes, providing an alternative storage solution while also enabling quick, convenient access to gloves.

## BUN PAN RACK COVERS

- Fit standard racks; enable easy application and removal without tearing or ripping
